“Omaha’s Lawn Care Experts”

## Granular Lawn Care Program

- 1 March - April**

Heavy rate of granular fertilizer with **natural organics** to promote early spring green-up. Also broadleaf weed control as needed.
- 2 April - May**

A double application of pre-emergent plus granular fertilizer to assure a good barrier against broadleaf weeds, crabgrass and foxtail. Plus an insecticide targeting sod webworm and billbug. Also broadleaf weed control.
- 3 June - July**

Balanced granular fertilizer formulated with **natural organics** and slow release nitrogen to provide summer long feeding. Also broadleaf weed control.
- 4 July - August**

A top quality granular insecticide (Merit) for control of white grub and sod webworm. Plus a well balanced, slow release, granular fertilizer. Also a broadleaf weed control.
- 5 August - September**

Balanced granular fertilizer formulated with **natural organics** and slow release nitrogen. Check lawn for white grub activity and apply insecticide if needed. Also broadleaf weed control.
- 6 October - November**

A super slow release granular fertilizer with **natural organics** to stimulate root growth and food storage for winter. Also helps early spring green-up. Broadleaf weed control as needed.

= with natural organics

Our comprehensive 6 step program is tailor made for the types of turf and weather conditions in the Omaha area. It includes a double application of pre-emergent in spring to assure a good barrier against broadleaf weeds, crabgrass and foxtail. A top notch insecticide MERIT is used in the July-August applications to prevent any grub related problems. All 6 of the applications contain natural organics which is very beneficial to the grass plant and soil. All applications are GRANULAR and are applied by licensed and trained personnel. Service calls are handled within 48 hours and absolutely FREE. Because our reputation is built on satisfied customers all our services and products are 100% SATISFACTION GUARANTEED.
